

## US Army Corps of Engineers

Vicksburg District  
4155 Clay Street  
Vicksburg, MS 39183-3435

# Public Notice

APPLICATION NO.:	ASW-200014470
EVALUATOR:	Ms. Anne Woerner
PHONE NO.:	(601) 631-5298
FAX NO.:	(601) 631-5459
E-MAIL:	regulatory@mvk02.usace.army.mil
DATE:	June 26, 2001
EXPIRATION DATE:	July 17, 2001

Interested parties are hereby notified that the U.S. Army Corps of Engineers, Vicksburg District, the Arkansas Department of Environmental Quality, and the Mississippi Department of Environmental Quality are considering an application for a Department of the Army permit and State water quality certification for the work described herein. Comments should be forwarded to the Vicksburg District, ATTN: CEMVK-OD-FP and the appropriate State Agency listed below. Comments must reach these offices by the expiration date cited above.

In Arkansas, water quality comments should be directed to the Arkansas Department of Environmental Quality at Post Office Box 8913, Little Rock, AR 72219-8913.

In Mississippi, water quality comments should be directed to the Mississippi Department of Environmental Quality, Office of Pollution Control, Post Office Box 10385, Jackson, MS 38289-0385.

Laws Requiring a Permit: Section 10 of the Rivers and Harbors Act of 1899 (33 U.S.C. 403), which applies to structures or work in navigable waters of the United States and Section 404 of the Clean Water Act (33 U.S.C. 1344), which applies to discharges of dredged or fill material into waters of the United States.

Name of Applicant:

Mr. Stan Ingram, Jr.  
Greenville Gravel Company  
Post Office Box 220  
Greenville, Mississippi 38702

Location of Work: Various locations on the Mississippi River between mile 591.3 and 507.5 AHP.

Description of Work: (See enclosed maps.)

The following descriptions of the proposed project and associated impacts are based upon information provided by the applicant.

The applicant is applying for a Department of the Army permit to dredge sand and gravel from the Mississippi River at various locations for commercial purposes. The sand and gravel will be dredged seasonally using a dust pan hydraulic dredge. The extracted material will be screened and the waste redeposited into the Mississippi River. The sand and gravel will be barged to the Greenville Gravel facility on Lake Ferguson in Greenville, Mississippi.

Dredging and the associated discharges of material in the Mississippi River, a navigable waterway of the United States, require a Department of the Army permit.

Upon reviewing this notice, you should write to this office to provide your opinion of the impacts this work will have on the natural and human environment and address any mitigation you believe is necessary to offset these impacts. Other comments are welcome, but the above information will further our review of the applicant's plan as proposed. Comments of a general nature are not as helpful as those specific to the impacts of the subject project.

State Water Quality Permit: The State Pollution Control Agency must certify that the described work will comply with the State's water quality standards and effluent limitations before a Corps permit is issued.

Cultural Resources: An initial review indicates that the proposed project would not affect any sites listed in the National Register of Historic Places. Copies of this notice have been sent to the State Historic Preservation Officers, Federally Recognized Tribes, the Corps archeologists, and other interested parties for comment on potential effects to cultural resources that could result from this activity.

Endangered Species: Our initial finding is that the proposed work would not affect any endangered species or their critical habitat. This proposal is being coordinated with the U.S. Fish and Wildlife Service, and any comments regarding endangered species or their critical habitat will be addressed in our evaluation of the described work.

Flood Plain: In accordance with 44 CFR Part 60 (Flood Plain Management and Use), participating communities are required to review all proposed development to determine if a flood plain development permit is required. Flood plain administrators should review the proposed development described in this public notice and apprise this office of any flood plain development permit requirements.

Evaluation Factors: The decision whether or not to issue a permit will be based upon an evaluation of the probable impact of the proposed activity on the public interest. That decision will reflect the national concern for both protection and utilization of important resources. The benefits which may be expected to accrue from the proposal must be balanced against its expected adverse effects. All factors which may be relevant to the proposal will be considered; among these are conservation, economics, aesthetics, general environmental concerns, historic values, fish and wildlife values, flood damage prevention, land use classification, navigation, recreation, water

supply, water quality, energy needs, safety, food requirements and, in general, the needs and welfare of the people. Evaluation of the proposed activity will include application of the guidelines published by the Environmental Protection Agency under authority of Section 404(b) of the Clean Water Act.

Public Involvement: The purpose of this notice is to solicit comments from the public; Federal, State, and local agencies and officials; Indian Tribes; and other interested parties. These comments will be used to evaluate the impacts of this project. All comments will be considered and used to help determine whether to issue the permit, deny the permit, or issue the permit with conditions, and to help us determine the amount and type of mitigation necessary. This information will be used in our Environmental Assessment or Impact Statement. Comments are also used to determine the need for a public hearing.

Opportunity for a Public Hearing: Any person may make a written request for a public hearing to consider this permit application. This request must be submitted by the public notice expiration date and must clearly state why a hearing is necessary. Failure of any agency or individual to comment on this notice will be interpreted to mean that there is no objection to the proposed work. Please bring this announcement to the attention of anyone you know who might be interested in this matter.

A handwritten signature in black ink, appearing to read 'W. Harold Lee', with a large, sweeping loop at the end.
